Inspection Report

SGS Report No. : MSRGZ2201452-01A
 Principal : TROPIC OCEAN (HK) LIMITED
 Declared Commodity : Silicon Metal
 Declared Quantity : 25MT
 Inspection Location : Hongkai Warehouse, Huangpu, Guangzhou, China
 Inspection Commenced : 1330hrs July 20, 2022
 Inspection Completed : 1540hrs July 20, 2022

SCOPE OF WORK

- Check packing and marking
- Visual cargo condition
- Sampling
- Sample preparation
- Sealing
- Analysis

PACKING

As far as visual and accessible, the cargo presented was noted with below packing status.

Packing Description	Abnormal Condition
Packed in polypropylene plastic woven jumbo bag of declared approximate 1000kg net each.	N/A

MARKING

Marking was not found during inspection:

No marking

CARGO CONDITION

Below cargo condition was found during inspection as far as visible and accessible:

Cargo condition	Abnormal Condition
In silver gray lumps condition with top size approximate 5mm	N/A

The report would be invalid without authorized signature. The report shall not be reproduced except in full, without written approval of the Company.

Unless otherwise agreed in writing, this document is issued by the Company under its General Conditions of Service accessible at <http://www.sgs.com/en/Terms-and-Conditions.aspx>. Attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law.

SAMPLING

Sampling type	: Random Sampling
Sampling Standard	: GB/T 2881-2014
Selected unit for sampling	: Total 25MT cargo was distributed into 1 lot, 18 bags were randomly selected for sampling. 1 increment with about 1 kilograms was taken from each selected bag by inserting cargo from surface to bottom of bag. 7 increments were drawn from surface, and the rest of 15 increments were drawn from middle and bottom position of selected cargo bags after dumping bags.
Sampling tool	: Stainless steel probe

SAMPLE PREPARATION

Gross sample collected was prepared at SGS sample preparation room for preparation of chemical sample. After sample preparation, related sample(s) was(were) distributed as below:
 1 set of lot sample was sent to Guangzhou lab for analysis for each lot.
 The remaining samples shall be kept by us for 3 months, after which time shall be disposed of.

SEAL BAGS

Total 25 cargo bags were sealed by SGS surveyor, with detailed seals number as below:

Lot No.	Seal No.	Quantity (bag)
1	M2055061-M2055085	25
Total		25

WARNING: Per principal's requirement, we put SGS seals on all the jumbo bags by locking the outer bands of each bag. However, as what principal was duly advised, this is not an absolutely safe way to protect cargo's integrity thereafter. Hence, SGS sealing jumbo bags only applies to the cargo that presented at the time and place of SGS attendance and does not refer to any other matters.

Seal number of the selected bags for sampling as follow:

Lot No.	Seal No.	Quantity (bag)
1	M2055061-M2055078	18
Total		18

WEATHER
Sunny

ANALYSIS

Testing results please refer to the testing report.

Any holder of this document is advised that information contained hereon is limited to the visual examination of the safely and readily accessible portions of the consignment only. Due to the nature of the cargo and limited access during inspection, items not recorded in the above description may be present.

The manual sampling method was agreed with the SGS Principal, as sampling by more reliable methods was not possible. Sampling of this type does not satisfy the requirements for probability sampling. The suitability of this sampling method is defined by the standard.

As per the instruction from the principal, SGS conducted the inspection for nominated cargo, without performing container and/or vessel loading or discharging supervision. Therefore, the contents of this report/certificate only reflects our findings at the time and place of inspection, and does not refer to any cargo that was shipped from or will be received at any port.

The sole function of any seals applied by SGS is to indicate that the material bearing such seals has been inspected by SGS. Seals applied by SGS are not intended to secure material, lock the containers of such material, or otherwise provide any security function. SGS does not provide security services and disclaims any liability in this respect.
